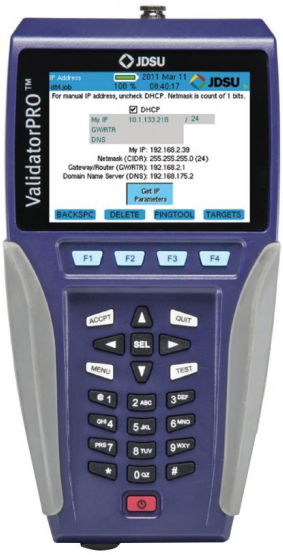
NT1055



VALIDATOR-NT - NETWERKTESTER

Algemene kenmerken

- Conducts BER testing to speed certify Ethernet data transmission speed up to 1000Base-T (1 Gbps)
- Measures SNR and skew to uncover impairments to electrical Ethernet data transmission
- Tests for opens, shorts, split pairs, miswires, and reversals and measures distance to opens and shorts—supports all copper network, telco, and coax cables
- Performs PoE load test to ensure maximum power is available from PoE source
- Performs port discovery to detect advertised Ethernet speed and displays capabilities of network devices
- Pings network devices to verify connectivity to active equipment
- Includes Plan-Um® software to create network layout; document cable tests; show network topology; and record moves, adds, and changes

Toebehoren

- 1 x afstandsmodule
- 1 set 1-8 afstandsadapters voor bedradingsplan (RJ11/RJ45) (TP612)
- 2 x lithium-ion herlaadbare batterijen (NT93)
- 2 x universele AC-adapters/laders
